 Plant list provided by Holden Arboretum

<b>GRASSES</b>						
<b>Water Tolerance definitions:</b>						
<b>very tolerant:</b>	generally lowland wet species surviving when flooded or exposed to high water table more than 40 percent of the growing season.					
<b>tolerant:</b>	generally lowland wet species surviving when flooded or exposed to high water table more than 30 percent of the growing season but less than 40 percent.					
<b>intermediate:</b>	generally lowland wet-mesic species surviving occasional inundation or elevated water table between 20 and 30 percent of the growing season.					
<b>Species</b>		<b>Common name</b>	<b>Height</b>	<b>Bloom</b>	<b>Sun/Shade Tolerance</b>	<b>Water Tolerance</b>
Carex	spp.	Sedges*	1-4'	-	Sun to Shade	Very Tolerant
Chasmanthium	latifolium	Northern Sea Oats	2-3'	August	Sun to Partial Shade	Moderate
Panicum	virgatum	Switchgrass	3-6'	August	Sun to Partial Shade	Moderate
Spartina	pectinata	Cord Grass	4-8'	August	Sun	Very Tolerant
Andropogon	gerardii	Big Bluestem	3-8'	Summer	Sun	Tolerant
Carex	hystericina	Porcupine sedge	1-3'	Summer	Sun	Very Tolerant
Carex	vulpinoidea	Fox sedge	1-3'	Summer	Sun	Very Tolerant
Elymus	canadensis	Canada wild-rye	3-5'	Early Summer	Sun to Partial Shade	Very Tolerant
